

Figure Me Out

- Stick your photo and write your name.
- Select certain facts about yourself that can be expressed in numbers.
- Convert those numbers into equations or math facts. For eg: Number of the month of year I was born in = $(5 \times 2) - 6/2$ (Psst! I was born in July)
- Write the equation of those facts in the circles. (Answer to be written in the small black outlined box).
- Pass this to your friend to solve and let them figure you out!
