

# Fraction Game 'How Many?'

## Objects Required

Children, all you need are the children.

## How to play "How Many"?

- > First, select 8 kids from the bunch.
- > Ask them to come to the front and stand, facing the rest of the children.
- > Divide the remaining kids into two teams.
- > The kids standing will be asked a question by an adult, if the answer to the question yes, then they will remain standing. If the answer is no, then they will sit down.
- > For each question, the teams (remaining children) will have to identify what fraction of the kids is standing.

# Fraction Game

## 'How Many?'

Example - If the adult asks, do you have a brother or a sister? Then those kids (the 8 standing in front) who do have another sibling will remain standing, and the rest will sit down. Say 5 children are standing and 3 sit down. Then the class will have to answer that the fraction of kids are standing, which is  $5/8$ .

### Things to note

- > After every 4 questions, change the kids who will stand in front.
- > The children selected to stand can be selected at random from any or both the teams.
- > One fraction is thrown at one team. If the team does not answer then that question

# Fraction Game

## 'How Many?'

passes to the other team.

> Only those kids who raise their hands will get a chance to answer. On speaking out of turn, or shouting the answer, the team would lose one point.

> For every right answer, the team will gain 2 points. No negative marking for an incorrect answer.

### Winning Team

The team with the highest score will win the game.
